

MEDIA RELEASE

FRA COMMENCES LAYING ASPHALT CONCRETE WORKS ON FOUR LANE PROJECT

30 January 2019

Works are progressing well on the four lane road project on Kings Road, Suva, between Rewa Bridge and 9-Miles.

Fiji Road Authority (FRA) Chief Executive Officer Jonathan Moore was on site today for the commencement of final coat sealing.

We will be carrying out road construction on the left-hand side on Kings Road from 9 miles to Rewa Bridge from Saturday 2nd February to 31st March. Works will be carried 24 hours.

During this time, we will be diverting both traffic on the right-hand side new carriage way.

Mr Moore has advised road users to drive with extreme caution and be mindful of construction machinery and equipment that will be used for these road works.

“Please factor in extra travel time in your journey, adhere to the speed limits and observe all road signs.”

Work on the 3.8km upgrade project is anticipated to be completed by June, weather permitting.
